

Aradel Holdings Plc (“Aradel”, “Aradel Holdings”, “the Company” or “the Group”), Nigeria’s leading integrated indigenous energy company, has successfully attained the ISO 9001: 2015 Certification for Quality Management.

ISO 9001: 2015 is an internationally recognised standard for quality management, which helps organisations improve efficiency, meet stakeholder expectations and demonstrate their commitment to quality. Its requirements define how to establish, maintain and continually improve a company’s quality management system to ensure consistent high-level processes and outcomes.

Additionally, Aradel recently obtained its re-certification of the ISO 14001: 2015 standards. This recertification demonstrates Aradel’s commitment to the continuous improvement of environmental practices and ongoing environmental responsibility, ensuring compliance with the standard’s requirements through regular audits and assessments.

As part of the independent audit for ISO 9001:2015, departments within Aradel demonstrated their adherence to and conformity with the Company’s principles, including a process-oriented approach with well-established standard operating procedures, a strong customer and stakeholder focus, and a commitment to continuous improvement all of which benefit from the active involvement and buy-in of top management and staff. This process was supported by Lenora Consulting Limited, who provided guidance throughout the process.

Since inception, Aradel has demonstrated an unwavering dedication to doing things differently to benefit Nigeria and its people, and this latest milestone further reinforces its commitment to excellence as the company fulfills its vision of delivering sustainable energy solutions that support economic development.

Commenting on the Certification, Adegbite Falade, MD/CEO Aradel Holdings, said, “Aradel’s continued strong performance over the years is a testament to our commitment to excellence and innovation, principles that are deeply embedded within our corporate culture. Our success is built on the solid processes and controls that drive our quality management systems and underpin our business operations. Achieving the prestigious ISO 9001:2015 certification for Quality Management and renewing our ISO 14001:2015 certification demonstrates our dedication to maintaining both profitability and sustainability

and positions us for even greater achievements in the future. I would also like to extend special recognition to the team, whose dedication and hard work made this achievement possible.'
